

ALEXIOS LOUKIS

Junior Cloud / DevOps Engineer

Patras, Greece | loykhsalexhs@gmail.com | alexiosloukis.dev | linkedin.com/in/alexiosloukis | github.com/AlexiosLoukis

PROFILE

Fourth-year Management Science & Technology student (Information Systems track) at the University of Patras, specialising in cloud infrastructure and DevOps. Hands-on with Docker, Linux, Python and GitHub Actions; currently provisioning Azure infrastructure with Terraform and preparing for the AZ-104 certification. Two international Erasmus+ IT support placements (Spain, Portugal). Available for part-time or full-time, remote or on-site roles alongside my studies.

TECHNICAL SKILLS

Containers: Docker, Dockerfile optimisation, Docker Compose, container networking
CI/CD & Automation: GitHub Actions, Git, automated build, test and deploy pipelines
Cloud & Web: Microsoft Azure (Azure CLI, resource groups, Azure Policy), DNS, TLS, static site hosting
Infrastructure as Code: Terraform (providers, plan/apply lifecycle, state) — in active use
Operating Systems: Linux (Ubuntu, Alpine, WSL), Windows, macOS
Languages: Python, Bash, SQL, Go (foundational)

PROJECTS

Personal Site with CI/CD and Custom Domain

Aug 2026

Astro, GitHub Actions, GitHub Pages, Cloudflare DNS

alexiosloukis.dev

- Built and deployed a static site with a two-job GitHub Actions pipeline (build, deploy) running on every push to main, using least-privilege workflow permissions and OIDC-based deployment.
- Configured apex A records and a www CNAME in Cloudflare, with an automatically provisioned TLS certificate and HTTPS enforced; diagnosed a negative DNS caching issue with dig and curl.
- Scored 97–100 across Lighthouse performance, accessibility, best practices and SEO audits; supports light and dark themes with WCAG AA contrast.

Multi-Container Web Application with Redis Caching

Aug 2026

Docker, Docker Compose, Python/Flask, Redis, GitHub Actions

github.com/AlexiosLoukis/flask-redis-docker-compose

- Built a Python/Flask REST API backed by Redis as an in-memory data store, packaged in an Alpine-based Dockerfile to minimise image size and attack surface.
- Orchestrated a two-tier web-and-cache architecture with Docker Compose and automated the image build and test with a GitHub Actions CI workflow.

EXPERIENCE

IT Support & Hardware Technician — Erasmus+ VET Placement

Jun 2023 – Sep 2023

Mobility Projects by Universal Mobility SL

Valencia, Spain

- Delivered front-line technical support across two repair centres, diagnosing and resolving OS, software and hardware faults for walk-in clients with same-day turnaround.
- Performed OS installations, migrations and software configuration across macOS, Windows and Linux.
- Worked in an international team in a second language, becoming independently productive on unfamiliar systems within two weeks.

Junior Hardware Technician — Erasmus+ VET Placement

Nov 2021 – Dec 2021

ITEK Informática

Braga, Portugal

- Selected at age 16 for a competitive European vocational training placement abroad.
- Supported IT retail operations: customer technical support, hardware diagnostics and software configuration.

EDUCATION

University of Patras — BSc Management Science & Technology

Sep 2023 – present

Information Systems Track, 4th year

Patras, Greece

Relevant coursework: Object-Oriented Programming, Data Structures & Algorithms, Database Management Systems (SQL), Software Engineering, Web & Cloud Application Development.

CERTIFICATIONS & CONTINUOUS LEARNING

- Microsoft Certified: Azure Administrator Associate (AZ-104) — in preparation, expected spring 2027
- Boot.dev DevOps path: Learn Docker, Git, Linux, Python (2026) — top 15% of learners, daily study streak
- Machine Learning Course — University of Patras / KEDIVIM (February 2026)

ADDITIONAL

Languages: Greek (native), English (fluent, C1)
